

Export Multiple Records as One WAV File

Event Reconstruct

To export multi-part call scenarios that may include multiple records from a phone, radio or both you need to utilize the optional Event Reconstruct feature. This feature must have been purchased and licensed on your recorder and the user given the Event Reconstruct permission in their Quantify User profile in order to use it.

Search & Replay

In Quantify Search & Replay, locate all the recordings that you want to export into a single WAV file and highlight them all.

In the Results panel, use the **Call Dock** to create a Workspace – click the **Call Dock** expand button (▼) and then click **Add to New Workspace** or drag and drop them to a new or existing Workspace.

The screenshot shows the RED BOX RECORDERS interface. At the top, there's a search bar with 'Untitled Search' and a search range from 29/01/2020 00:00 to 29/01/2020 23:59. Below the search bar is a 'Start Search' button. The main area is the 'Results' panel, which contains a table of call records. A red arrow points to a play button icon in the 'Call Dock' area above the table. The table has columns for 'End Time', 'Call Duration', 'Extension', 'Other Party', 'Call Direction', 'Group', 'Channel Name', 'Logical Channel', and 'Ring Time'. The table contains 15 rows of data, all with 'Incoming' call direction and 'County Hotline' or 'PD 1' as channel names.

End Time	Call Duration	Extension	Other Party	Call Direction	Group	Channel Name	Logical Channel	Ring Time
2020 13:16:07	00:00:11	225.8.11.81 (11...		Incoming		County Hotline	0	0
2020 13:15:49	00:00:11	225.8.11.81 (11...		Incoming		County Hotline	0	0
2020 13:15:40	00:00:15	225.8.11.81 (11...		Incoming		PD 1	0	0
2020 13:15:08	00:00:23	225.8.11.81 (11...		Incoming		County Hotline	0	0
2020 13:14:14	00:00:13	225.8.11.81 (11...		Incoming		County Hotline	0	0
2020 13:13:49	00:00:11	225.8.11.81 (11...		Incoming		County Hotline	0	0
2020 13:13:31	00:00:13	225.8.11.81 (11...		Incoming		County Hotline	0	0
2020 13:12:53	00:00:12	225.8.11.81 (11...		Incoming		County Hotline	0	0
2020 13:13:00	00:00:19	225.8.11.81 (11...		Incoming		PD 1	0	0
2020 13:12:39	00:00:12	225.8.11.81 (11...		Incoming		PD 1	0	0
2020 13:11:53	00:00:17	225.8.11.81 (11...		Incoming		County Hotline	0	0
2020 13:11:32	00:00:11	225.8.11.81 (11...		Incoming		County Hotline	0	0
2020 13:10:53	00:00:16	225.8.11.81 (11...		Incoming		County Hotline	0	0

To add recordings to a Workspace, just drag and drop them from the **Results** panel to the Workspace in the **Call Dock**.

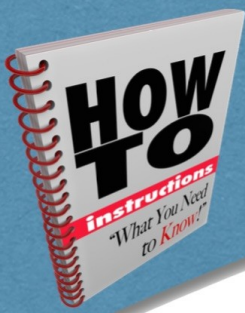

Perform as many searches as you need and add the recordings you're interested in. You can add recordings to a Workspace at any time – just drag and drop or highlight them and click the **+Add to Workspace** button in the Call Dock.

Use a Workspace

To open a Workspace, just double-click the Workspace in the **Call Dock**, or select **Event Reconstruct** from the Quantify main menu and select the Workspace.

Your Workspace will open in Event Reconstruct where you can visualize, replay and export the whole incident.

You can switch between **Sequential** and **Concurrent** playback modes to change how you listen to the incident, and you can switch between **Timeline** and **Grid** views to help visualize the incident.

Export Multiple Records as One WAV File

The screenshot shows the RED BOX RECORDERS interface. At the top, there's a workspace area with a toolbar containing a play button, a list icon, a grid icon, and a WAV icon. Below this is a channel list with 'County Hotline' and 'PD 1'. A timeline view shows a grid of time slots from 13:00 to 13:20. Below the timeline is a date bar for 'Wednesday, 29 January 2020'. At the bottom is a media player with a waveform and a 'Call Export' dropdown menu. The dropdown menu is open, showing options: 'High Quality Audio', 'Multiple WAV Call Export', 'Multiple WAV Call Export', and 'Single WAV Call Export'. The 'Single WAV Call Export' option is highlighted. Red arrows point to the 'Play Entire Incident Button', 'Timeline View', 'Concurrent Replay', 'Export WAV Tab', and 'Export WAV Link'.

At the top, select **Timeline View** and **Concurrent Replay** and press the **Play** button to load the entire incident into the media player.

When the media player opens below you will be able to select the **Export WAV** tab and from the dropdown box select **Single WAV Call Export**.

Click the **Export WAV** link to the right and choose where to save your file.
